

When Quality Matters

CCQM Certified ISO 28000 Lead Implementer

Master the implementation and management of Supply Chain Security Management Systems (SCSMS) based on ISO 28000

Why should you attend?

ISO 28000 Lead Implementer training enables you to develop the necessary expertise to support an organization in establishing, implementing, managing and maintaining a Supply Chain Security Management System (SCSMS) based on ISO 28000. During this training course, you will also gain a thorough understanding of the best practices of Supply Chain Security Management Systems and be able to improve efficiency in managing potential security risks and their impacts in an organization's supply chain.

After mastering all the necessary concepts of Supply Chain Security Management Systems, you can sit for the exam and apply for a "CCQM Certified ISO 28000 Lead Implementer" credential. By holding a CCQM Lead Implementer Certificate, you will demonstrate that you have the practical knowledge and professional capabilities to implement ISO 28000 in an organization.

Who should attend?

- Managers or consultants involved in Supply Chain Security Management
- Expert advisors seeking to master the implementation of a Supply Chain Security Management System
- Individuals responsible for maintaining conformance with SCSMS requirements
- SCSMS team members

Course agenda

Duration: 5 days

Day 1 | Introduction to ISO 28000 and initiation of a SCSMS

- Course objectives and structure
- Standards and regulatory frameworks
- Supply Chain Security Management Systems (SCSMS)
- Fundamental principles of Supply Chain Security Management Systems
- Initiating the implementation of a SCSMS
- Understanding the organization

Day 2 | Plan the implementation of a SCSMS

- Analysis of the existing management system
- Leadership and approval of the SCSMS project
- SCSMS scope
- Supply Chain Security policies
- Risk assessment
- Objectives, targets and programs

Day 3 | Implementation of a SCSMS

- Organizational structure and Supply Chain Security Management
- Documentation management
- Setting security objectives and targets
- Communication plan
- Training and awareness plan
- Implementation of a security management program
- Emergency preparedness
- Operational control

Day 4 | SCSMS monitoring, measurement, continuous improvement and preparation for a certification audit

- Monitoring, measurement, analysis and evaluation
- Internal audit
- Management review
- Treatment of non-conformities
- Continual improvement
- Preparing for the certification audit
- Competence and evaluation of implementers
- Closing the training

Day 5 | Certification Exam

Learning objectives

- Acknowledge the correlation between ISO 28000 and other standards and regulatory frameworks
- Master the concepts, approaches, methods and techniques used for the implementation and effective management of a SCSMS
- Learn how to interpret the ISO 28000 requirements in the specific context of an organization
- Learn how to support an organization to effectively plan, implement, manage, monitor and maintain a SCSMS
- Acquire the expertise to advise an organization in implementing Supply Chain Security Management System best practices
